PRAIMY

Precautions when using the body device:

1. Press the power button for more than 3 seconds to turn it on. It cannot work while charging.
2. When using the finger, hold the sensor strip around the metal surface to form a loop with the human body.
3. Use with cleansing water or cleansing lotion when exporting. Do not use it with facial cleanser/cleansing oil.

Features

Skin Rejuvenation Face Massager

this is a deep cleansing, revitalizing skin instrument, which put many functions in one, such as positive and negative ions + EMS micro current + heating + micro vibration+ Phototherapy.

Positive and negative ions: the principle of Congeniality afoul, isomerism attracted.The active ionic component in skin care products will accelerate and strengthen the pores and cell gaps through the skin and penetrate into the skin, which will more than double the penetration rate of skin care products. Among them, the positive ions are exported, combined with the makeup remover, the deep dirt is exported, and the skin is thoroughly cleaned; the negative ions are introduced, and the skin care products are used to penetrate the muscle base and protect the skin.

EMS micro-current: stimulating muscle and massage through micro-current, which restores muscle elasticity. At the same time, current stimulation of the dermis also promotes the production of more ATP, which is a key substance for collagen production.

Heating: Warming promotes absorption, stretches the skin texture, which make the skin becomes fuller.

Micro-vibration: using mechanical vibration and electronic stimulation to tighten the human skin, increase its elasticity and enhance the metabolism of skin cells.

Phototherapy: Blue Light repairs rough skin surface, makes skin fine and smooth, inhibits acne and eliminates acne; red light promotes collagen production and effectively inhibits skin wrinkles/darkness/stain, restores skin's elasticity and shine.

Name of each component

- Massage head
- light shade
- Ion sensor strip
- Cotton pad fixing ring
- Cleansing silicone brush
- Intensity plus button
- Strength minus button
- Power/mode button
- Power supply port

Product Parameters

Product Name	Deep Cleansing Brush
Models	NICY
Product Size	36*66MM
Product Net weight	95G
Including	One machine, Manual and USB line
Input voltage	DC 5V/1A
Rated power	4W
Rated voltage/Rated Capacity	3.7V/600mAH
Waterproof	IPx7
Intensity	4
Place of origin	Shenzhen
Executive standard	GB 4706.1-2005
	GB 4706.15-2008

Four modes of use

Press the power button to switch the mode, press the high and low buttons to adjust the current strength or vibration.

The first mode Export mode (blue light + EMS micro current + micro vibration + heating) --- Insert the cleansing cotton on the alloy surface, adjust the current with high and low button.
Second mode Cleansing mode --- Use silicone cleansing, adjust the current with high and low button.
The third mode is the import mode (red light + EMS micro current + vibration + heating) ---Put essence on the surface of the alloy, adjust the current with high and low button.
The fourth mode phototherapy mode (phototherapy + heating) --- Contact the face with the alloy surface for phototherapy.
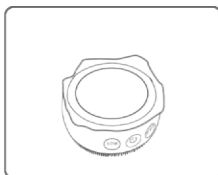

note:
* Use export mode first, then use cleansing mode.
  - First remove the dirt from the pores to the surface of the skin, then wash it off with facial cleanser.
* Each mode sets a 4-minute usage time.
* After 4 minutes, the instrument will enter the standby state, and will automatically shut down after 1 minute of no action.

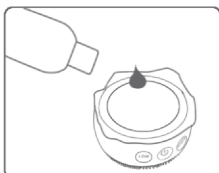

How to use the export mode
(use with cotton pads)

- Preparing a cotton pad
- Attach a cotton pad
- Pour the makeup remover and turn it on
- Face circle cleaning

Import mode usage

- Apply a mask to the face
- Turn on, select import mode
- Hold the sensor strips on both sides of the instrument and lift the face from top to bottom
- Leave the remaining mask essence clean, wash off or massage

---

Phototherapy mode use

- Apply toner or lotion evenly to the skin
- Turn on, choose phototherapy mode
- Hold the instrument and touch the sensor strips on both sides of the instrument to lift the face from bottom to top.
