- 1) Insert the power plug into a wall socket. The LED display will come up and stay **on**.
- 2) Press and hold down the Power button for 3 seconds to turn **On/Off**.
- 3) Use the (+) or (-) buttons to adjust **temperature** between 250°F and 450°F.
- 4) The temperature setting LED light will keep flashing and will stop **flashing** once desired **temperature** is reached.
- 5) Once the temperature setting LED light is **solid**, the brush is ready to use.
- 6) For safety all button will be locked. To unlock, press the "Power **Switch**" button twice (2) **simultaneously**.
- 7) Hold the brush from handle **and** keep a safe **distance** from exposed skin and eyes.
- 8) To turn Off the appliance, please unlock the Settings by pressing the "Power Switch" button twice (2) **simultaneously**, then Press **and** hold the "Power Switch" button for 3 seconds **to** switch On/Off.

HOW TO USE IT ?

Always use this comb on clean, dry hair with free of gels and creams.
Separate a section of the hair.
Place the Comb close to the roots of selected hair. Avoid touching the scalp as this may cause burn.
Hold the hair end firmly and brush down the length of the hair from root to tip. Repeat as necessary.
After use, press the button 'Power Switch' to switch off and unplug the appliance. Please wait until cooling down to pack up.

HEAT TEMPERATURES

320°F is for medium length beard. Thin, fine, or bleached hair.
340°F to 360°F is for thick or coarse beard. Dyed or dark color hair.
380°F to 400°F is for hard-to-style beard. Normal or slightly curled hair.
410°F is for thick and very curly hair, **or** difficult to style hair.
